

We supply shrink wrap machines, bank note banding machines, coin counting machines, and the consumables that keep them running — all backed by our own installation, repair, and maintenance service.

## Shrink Wrap Machines

Compact, high-output packaging machines that protect your products efficiently and effectively.

### Ladypack

90° heating oven, impulse sealing with a nickel-chrome blade, motorized conveyor feed. Six sizes/configurations to match your throughput:

#### FLAGSHIP

#### Ladypack 45N/A2

- Flagship — combined N/A2 configuration of the 45 footprint
- Touch-screen PLC control panel, guided cycle settings
- Foot-pedal operation, integrated film-roll holder

#### Ladypack 45

- Smallest footprint — lower-volume, bench-side runs
- Forward-forward or forward-reverse conveyor cycles

#### Ladypack 65

- Most-supplied configuration — wider table, taller clearance
- Programmable tunnel temperature, belt speed, sealing time

#### Ladypack 110

- Largest of the range — wider arch, higher throughput
- Suited to cash centres and bulk packaging runs

#### Ladypack Klok 550

- Larger-format model for bigger or bulkier items

#### Ladypack Table Top

- Compact bench/table-top configuration

### Adpak / Smipack SL Series

Entry-level L-sealing hood packer, lower output while keeping most S-series features:

#### Smipack SL45

- Entry-level — outputs up to 300 packs/hour
- Compact single-column hood packer

#### Smipack S560N

- S-series core industrial range — higher throughput
- Powered take-away conveyor

#### Smipack S560NA

- Same S-series performance, alternative chassis finish

**Shrink wrap films:** PVC, Polyolefin, and Polyethylene film in a range of thicknesses and sizes to match your product requirements. See the Consumables Reference Sheet for more.

## Bank Note Banding Machines

Advanced banding machines for secure, efficient currency handling and streamlined cash management, supplied to banks across Ghana.

### Akebono OB Series

Arch-style tabletop machine for heat-sealed paper or film bands around bundled items. Three arch sizes on the same mechanism:

#### Akebono OB-360

- Up to 30 banding cycles/minute
- Bands 30×10mm up to 420×210mm
- Paper or film tape, no parts change

Photo coming soon  
akebono-ob460.jpg

#### Akebono OB-460

- Larger arch than the OB-360
- Newly added to our lineup

#### Akebono OB-560

- Largest arch — higher-volume banding floors
- Optional large dispenser available

#### Mabas SBM-90

#### Mabas SBM-90 Banding Machine

- Integrated ink-jet band printer
- Prints bank/branch/operator/date across 4 lines
- 3 lines operator-configurable (20 chars each)

#### Alternative / Budget-Line Banding Machines

For customers who don't need the Mabas SBM-90's integrated printer:

DINGYE CE ISO

#### DFM5540

- Chinese-manufactured, similar form factor to the Mabas SBM-90
- Lower price point

#### FM5540

- A step up from the DFM5540 within the same line

**Note:** the DFM5540 and FM5540 are independently manufactured and are not Mabas products — parts, firmware, and service are not interchangeable with the genuine Mabas SBM-90.

**Banding bands & tape:** pre-printed and blank paper bands, and film tape, sized to your bank's branding and denomination requirements. See the Consumables Reference Sheet.

## Coin Counting Machines

Fast, accurate single-denomination coin counters built for continuous, high-volume processing.

### Coin 100 / 120

- Portable, cost-effective single-denomination processing
- Simple double-dial setup for thickness/diameter
- Continuous counting — can be fed while running
- Ideal for gaming, vending, or banking use
